

MEDICAL RECORD

Patient Name: John Doe

DOB: 05/15/1961 (Age: 65)

Date of Visit: Jan 08, 2026

Provider: Dr. Sarah Smith, MD

CHIEF COMPLAINT:

Evaluation for elevated PSA.

HISTORY OF PRESENT ILLNESS:

65-year-old male presents for follow-up of elevated PSA levels.

PSA history: 3.2 (2024), 4.5 (2025), current 6.4 ng/mL.

Patient denies urinary retention or dysuria.

PHYSICAL EXAM:

Genitourinary: Normal external genitalia.

Digital Rectal Exam (DRE): Prostate enlarged (~40g).

Discrete, firm nodule palpable on the left lateral lobe.

Right lobe smooth.

ASSESSMENT:

1. Elevated PSA (R97.20)
2. Nodule of Prostate (N40.2)
3. Benign Prostatic Hyperplasia (N40.0)

PLAN:

Given the combination of elevated PSA (>4.0) and palpable nodule on DRE, proceeding with Transrectal Ultrasound (TRUS) guided prostate biopsy.

Risks/benefits discussed with patient. Patient consents.

Signed,

Dr. Sarah Smith, MD
